

After long last our Ghosts & Haunts paranormal location directory is now available via the "Layar" browser. We've been working closely with the Layar team to generate a mobile application which will allow you to find the haunted locations in our directory near you. The "Layar" application is available for free for most major smart phones. To download the Ghosts & Haunts layer and the application simply go to the Layar website by clicking [HERE](#) . Also make sure to start adding all the Haunted locations near you to this site for all to enjoy.
