

We've recently added our "Haunts" directory. We are attempting to build a global directory of haunted locations, or locations with paranormal activity which are open to the public, or available by request.

If you are ware of any haunted locations, please feel free to add them to our directory. Please include full address information. Its important to have the correct address.

We will soon be publishing an iPhone and Android application which will allow you to see haunted locations near you as you travel. Just click on [HAUNTS](#) to see current haunted locations or add one or more.
